## ARMENIA *PRA (Voice of Armenia)*

FS on 1314. I could confirm Azeri 1345 parallel 4810. So a change in the schedule again:

0430-0500 Farsi	864	4810
1345-1400 Azeri	1314	4810
1400-1415 Azeri [mtwtf]	1314	4810
1400-1415 Turkish [ss]	1314	4810
1415-1430 Turkish	1314	4810
1430-1500 Kurdish	1314	4810
1600-1630 Kurdish	1395	4810
1700-1730 Kurdish	1395	
1730-1745 Assyrian	1395	
1900-1930 Arabic	4810

**ETHIOPIAN JAMMING HITS VOICE OF AMERICA, DEUTSCHE WELLE**

BBC Monitoring (BBCM) can confirm that two major Western broadcasters are suffering consistent jamming of their transmissions to Ethiopia. Jamming is deliberate interference aimed at preventing the target broadcast from being heard. The standard technique is to transmit an irritating noise or continuous music on the same channel as the target.

In the latest media development to hit the Horn of Africa, the scene of numerous "radio wars" over the past quarter-century, shortwave broadcasts from Washington-based Voice of America (VOA) and Germany's Deutsche Welle (DW) are now being jammed.

In both cases, the target of the jamming is radio programmes in Amharic, the lingua franca and main official language of Ethiopia. VOA is also suffering jamming of another of its regional language services. The deliberate interference appears to have started in the first half of this month, possibly on or around 12 November.

VOA and Cologne-based DW are funded by the US and German governments to broadcast radio and TV programmes to foreign audiences. The moves against the VOA and DW follow intensification by Ethiopia of its jamming of broadcasts from neighbouring Eritrea. The jamming of Eritrean state radio, the latest episode of which began in summer 2007, was stepped up in late September and early October, BBCM observed at the time. Details of the jammed broadcasts

The VOA's daily one-hour (1800-1900 ) service in Amharic is now being jammed. According to the opposition website Ethiopian Review - <http://www.ethiopianreview.com> - the jamming of VOA began on 12 November. BBCM observations have confirmed the presence of jamming signals on at least three of the five frequencies used by the VOA. The direction whence the jamming originates (established by the use of directional aeriels) is consistent with the signals being transmitted from within Ethiopia.

VOA currently uses 9320, 9860, 11675, 11905 and 13870 for its Amharic service. The service is not streamed on the Internet, but audio of recent broadcasts is available at <http://www.voanews.com/horn>

On 19 November, VOA's service in another major Ethiopian language, Oromo, was also observed to be jammed. VOA's Oromo service broadcasts at 1730-1800 gmt, immediately before the Amharic transmission and on the same frequencies.

DW's daily one-hour (1400-1500 gmt) service in Amharic is also being jammed. Noise interference has been observed on two of DW's shortwave frequencies (11645 and 15640 kHz). DW recently added a third frequency (15660 kHz). At the start of its Amharic programme on 19 November it announced that this had been done in response to the jamming. The lead item in the news bulletin that followed was that the Ethiopian government had conducted air raids on villages in the Ogaden region in the southeast of the country. DW maintains a multimedia website for its Amharic service at <http://www2.dw-world.de/amharic>

Opposition broadcasts Ethiopia has also jammed various private opposition radio broadcasts. The country has been targeted for many years by such operators, which hire airtime (generally an hour a day or on certain

days of the week) from commercial shortwave transmission facilities, including those based in Germany and the former Soviet Union. The number and identity of such broadcasts, and their schedules, often varies, depending on the availability of funds to hire short wave airtime. Eritrea is also targeted by private opposition short wave stations. **Source: BBC Monitoring research 16-19 Nov 07)(November 20th, 2007 - 11:07 UTC by Andy, Media Network blog via WORLD OF RADIO 1383, DXLD**

**R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX Oct 9**

**UKRAINE** On the RUI website this message now appears....  
`#23.00-04.00 7,440 41 Lviv North America  
\*ENGLISH #00.00-01.00 7,440 and #03.00-04.00 7,440  
Notes: # The transmissions has been temporarily stopped`  
So some hope remains that it will return, tho from B-07, 7530 has  
been planned instead. **Glenn Hauser, DX LISTENING DI-**  
**GEST**

On October 11 transfer RUI in the North America from L'vov to  
7440 kHz 2300-0400 they cease. Reason is traditional - shortage  
of finances. **Alexander Yegorov, Kiev, the Ukraine / " open\_dx" via**  
**Rus-DX Oct 14 via DXLD**

Correction to the sent out by me previously timetable. Since Octo-  
ber 28 will change output into ether of English transfer RUI with  
0800 (frequency of 7440 kHz) to 1000 (frequency of 9950 kHz).  
**Alexander Yegorov, [g],[Kiev], the Ukraine/"open\_dx" via Rus-DX Oct**  
**21 via DXLD ?** What is that in human English?
